Q3 What are your proposals to develop the app aimed at supporting the results of the Strategic Indicator of Child Vaccination Coverage?

Total responses : 17
Total skipped : 15

1. Following is important to be in the app-1) age2) past disease3) gender4) last vaccination taken-date and name of vaccine6) next vaccination date7) where can the vaccination be taken 8) benefits of vaccination 9) vaccine dosage form and details to be prov

2. Its Already well planned

3. YES

4. It's good application and should be developed

5. Integrate sweatcoin to encourage people to walk more

6. ADVERTISING

7. more awareness, no one really knows about this

8. let people know more about this because not all people are aware of this.

9. The app should include a small description (video,images etc..)about the vaccine preventable complications(if not vaccinated)disease like measles,mumps,meningitis affected children images.

10. valid informations about vaccinations benifits, how it can reduce morbidity and mortality rate, and reduce disabilities, it would be amazing if parents can download their children's vaccination schedule with reminder masseges not to forget their appointme

11. very good idea for improving vaccination and it will reduce nurses worklord. Now after the due date nurses are calling and reminding parents.

12. no changes required. Proposed plan about smart vaccination by you well and good and hope

everyone will get benefit out of it.

13. adult vaccination also to be included

14. None

15. Keep the app simple

16. i suggest linking the actual vaccinations record in the hospital, instead of manual entery of the data..it should cover all ages until the death..travel Vaccine , old age vaccine

17. Publish more info and app details on social media
